## Ultra Micro PSA N2 Gas Generators with built-in oil free compressor

Desktop Micro PSAs for analytical work at Universities \& R\&D Institutes

## Micro Mini I

Built-in compressor: designed for long life \& low noise
The compressor is operated at $50 \%$ of rated load to achieve $+10,000$ hrs run reliability with low power cosumption
$\qquad$ Proprietary manifold solenoids
Patented Miniature manifold solenoids make it possible to design compact PSAs with high reliability \& ease of operation.

Internal sensors and LCD display make diagonosis easier for problems
Oxgen concentration sensor, flow rate sensor and current sensors are built-in for smooth operation but in case of unexpected events, the monitoring system will leads to a fail safe system shut down with appropriate error messages

Specifications Note1. Factory certified purity level is measured by remaining 02 gas in produced output gas.
